Objective

Looking for a **software engineering internship**, where I can use my skills in **React.js, Spring Boot, MySQL** to help build useful and easy-to-use products, improve customer experience, and learn by working on real challenges.

EDUCATION

Dha Suffa University
BS Computer Science

2023 - 2027

Skills

Front-End Development: React .js

Back-End & Database: Java, Spring boot, MySQL

Tools & Cloud: Git, GitHub, IntelliJ IDEA, Visual Studio Code, MySQL Workbench, Postman

Projects :

University Lecture notes sharing Web App Spring boot | React.js | JPA | MySQL | Aws Nov 2025

- Designed and developed a university **notes sharing platform** using Java, Spring Boot, React, and MySQL, planing to serve 100+ students with streamlined access to resources.
- Implemented secure JWT authentication for complete user control over uploading, updating, and deleting notes.
- Built an admin dashboard for monitoring uploads, moderating content, and ensuring verified contributions.
- Integrated cloud-ready deployment plan using **AWS EC2, RDS MySQL and S3 to store files**
- Emphasized **code maintainability and reliability** through modular architecture (Spring Boot + JPA).

Web Application for Job Search and Recruitment Java | MySQL Jul 2025

- Designed and developed a full-stack web application using **Java**, JSP/Servlet, MySQL, JPA, and Hibernate.
- Implemented advanced features such as job filtering by city, field, salary, experience, and type.
- Enabled companies to manage profiles, post jobs, and review applicant CVs while applicants could update and track their applications.
- Prioritized **code quality and correctness** with thorough validation of database interactions and application workflows.

Bank Management System Java | MySQL Apr 2025

- Developed a Bank Management System desktop application using **Java Swing** and **MVC architecture** for clean and modular design.
- Implemented login/signup, account transactions, and profile management features with JDBC and MySQL
- Designed transaction history tracking and ensured smooth database interaction using DAO and Service layers.

Certification

Skyscanner Front-End Software Engineering virtual experience programme on Forage - August 2024

- Completed a job simulation where I built a web application using React as a **front-end engineer** at Skyscanner.
- Developed a page for picking a travel date using Skyscanner's open-source Backpack **React** library.
